Commitment to achieving Net Zero

Telcom Group trading as Elevate is committed to achieving Net Zero emissions by 2050, in line with government and industry targets.

Baseline Emissions Footprint

Our first carbon assessment was completed for the 2021 calendar year (published in 2022). This remains our baseline year.

Baseline Year: 2022	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	39.54
Scope 2	0.73
Scope 3 (Included Sources)	78.35
Total Emissions	118.63

Reporting History

Telcom Group trading as Elevate first completed a carbon emissions assessment for the 2021 calendar year (published in 2022), which serves as our baseline year. Due to internal restructuring and changes in reporting priorities, no assessments were published for 2022 or 2023. Reporting has now resumed with the 2024 assessment, independently verified by Carbon Footprint Ltd, and future reporting will continue on an annual basis.

Current Emissions Reporting

The most recent carbon footprint was independently verified by Carbon Footprint Ltd for the 2024 reporting year (published June 2025).

Reporting Year: 2024	
Current year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	445.95
Scope 2	26.5
Scope 3 (Included Sources)	1,454.09
Total Emissions	1926.54

Emissions have increased substantially compared with the 2021 baseline. This is primarily due to the expanded organisational boundary following Telcom Group’s acquisition of Luminet Solutions Ltd in October 2023, which has now been incorporated into Group reporting.

Comparisons

All reductions and performance improvements are therefore measured against the 2021 baseline year. While there is a two-year gap in published data, this does not affect the validity of the baseline, and progress can still be demonstrated against that year.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- A 50% reduction in emissions intensity (tCO₂e per £m turnover) by 2030.
- A 90% reduction in emissions intensity by 2045.

These targets will be supported by measures such as:

- Transitioning company vehicles to low-carbon alternatives (EVs, HVO fuels).
- Improving energy efficiency across all sites.
- Increasing renewable energy procurement.
- Engaging with suppliers on carbon reduction initiatives.

Carbon Reduction Measures to Date

Sustainability Data Collection: Telcom Group trading as Elevate initiated systematic sustainability data collection using the Sustrax MX platform, enabling consistent tracking of energy consumption, fuel use, and other emissions-related metrics across all operations. This foundation supports informed decision-making for targeted carbon reduction initiatives.

Independent Verification: Our emissions data has been independently verified to ISO 14064-3:2019 standards by Carbon Footprint Ltd, ensuring the accuracy, reliability, and transparency of our reporting. This verification provides stakeholders with confidence in our environmental performance and progress.

Integrated Reporting Framework: All Group entities have been consolidated into a single carbon reporting boundary, allowing for a holistic assessment of the Group's overall carbon footprint. This integration supports coordinated reduction strategies, identifies key emission sources, and streamlines future reporting.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
